The position of the public accountant in respect to corporations and their management is always an independent one. Unlike the attorney, he is not expected to make out a case. The character of the service he renders is impersonal. All he can do is to tell what the facts are, and they exist for this examination in forms so tangible and so subject to other scrutiny than its own that even if he were willing to prostitute his calling he would nevel are to do so. It is equally true that the knowledge he obtains of the affairs of corporations is necessarily intimate, accurate and substantially when the composition was the control of the composition of the compositio

DYNAMITE BOMBS

Have Been Planted for the Night Riders.

Nashville, Tenn., July 15.—The depredations of the night riders have gaused the cit zens of Tiptonville, in Sake county, to adopt extraordinary means for their mutual protection. Five hundred pounds of dynamite has been planted in the shape of mines at every place in the county likely to receive a visit from the viders, and a committee from the Law and Order League, named for the purpose, has been trained to set off the mines at the proper moment. The county jail, in which the suspects are imprisoned, was surrounded last night and the immates given to understand that a dummy hanging to a celegraph pole at a convenient distance was a representative of one of their number who had refused to talk when requested. As a result it is alleged that considerable light was thrown on the operations of the riders by those of their number in the jail.

Five hundred men have been arrested in the Fourth district for alleged night riding. The arrests were based on information furnished from Obion county. Other arrests are to follow. It is said that many prominent men are under suspicion of being allies of the desperadoes. Nashville, Tenn., July 15.—The depredations of the night riders have
